Summary

My journey as a front-end developer began two years ago, and since then, ReactJS has become my primary tool for crafting dynamic and user-friendly web experiences. I've delved into the core principles and intricacies of this powerful library, mastering its component-based architecture, state management techniques, and performance optimization strategies. My hands-on experience spans building reusable components, integrating with various APIs, and implementing efficient rendering techniques to ensure smooth user interactions.

Education

- **Bachelor Degree of Computer Science.**
  2019 - 2022

  Faculty of Science, Tanta University

  Graduation Project: **The partition of user experience for library website.**

  Graduation Project Grade: **Excellent**.
